Aug 25, 2017 Version 1.0.6 This app has been updated by Apple to display the Apple Watch app icon. - Support for 64-bit devices - Enhanced Graphics - Improved Performance - Small bug fixes Good game. Entertaining to drive the original cars from the show. Should add the electric car they built. Super fun game though. However I think there are a couple glitches making it impossible to get 100% in the destruction rounds, specifically level 8 with the limos. Also, in the information section, some of the info as far as who drove what car in the series is incorrect. James May and Jeremy Clarkson switched on some of the vehicles. Yes.... I watch too much Top Gear!!!! This game is fun but there is glitches through the game but the game reminds me of beamNG drive in a different way Lol Terrible game if you like game it won't like you play with game as expensive if your intrigue in the game watch the show an get a different game don't get play with games stuff there cheap and expensive The developer, Play With Games Ltd, has not provided details about its privacy practices and handling of data to Apple.
